

CORPORATE HEALTH & SAFETY PROGRAMS

www.northampton.edu/SAFETY

Work-related fatalities and injuries are at an all-time high in the Lehigh Valley. While injuries and fatalities result in an immediate disruption to your organization, it is the enormous direct and indirect costs that will impact your workforce, organization and ultimately your bottom line for years to come.

Organizations that adopt and implement a culture with an emphasis on health and safety reap benefits that impact all areas of the organization. A commitment to regulatory compliant safety practices results in:

- Reduced Worker's Compensation Insurance premiums
- Healthier bottom lines
- Increased worker morale
- Greater employee retention
- Improved worker health
- Improved corporate citizenship

We provide free, on-site safety assessments that include a tour of your facility and non-regulatory consultation. The assessment provides a basis for any remediation your organization may need to prevent worker injuries and costly citations. Once the assessment is complete, we can develop a plan that meets your goals at a time frame that accommodates your organization.

To set up an assessment appointment or to learn more about our programs, please call 610-861-5467 or email safety@northampton.edu.
