Life Science/Healthcare Industry Partnership

Worker Training Program

Career Institute of Technology is prepared to offer the following training opportunities in addition to its regular health related technical education programs.

- Our facility, which is located north of Easton and near the Stockertown exit of PA Route 33, is centrally located for a variety of training classes. We are particularly well located for attendees from the Easton, Nazareth, Slate Belt, and Phillipsburg, NJ areas.
- Supervisory Training – We will work with the partnership members and/or employers to develop and offer supervisory training in both classroom and health lab settings. Our Professional Development Program can be used as a basis for the professional or soft skills component of this training.
- Career Institute of Technology can be the site for a Career Linking Academy for high school or middle school students on Saturdays or during the summer months. Our classrooms and labs, and our location, which is accessible to various health care facilities, make us an excellent location for such programs. We also have experienced staff who regularly work with high school students.
